

ELECTRONIC WORK DIARY

Recording driver work hours is now easier than ever with Electronic Work Diaries. MTDData's EWD solution is used to record work and rest times of heavy vehicle drivers electronically, which can be used as an alternative to Written Work Diaries. Drivers simply log their work and rest periods by pressing a button on the in-vehicle driver screen, Talon, saving time in their day from reduced manual paperwork.

MTData's EWD is approved by the National Heavy Vehicle Regulator, ensuring fatigue compliance across your entire fleet. EWDs can be viewed to plan and monitor driver work schedules in line with Australian Fatigue Schemes (Standard, AFM, BFM and 2-UP).

Maximise safety

Prevent breaches with alerts for drivers for breaks and monitor working hours in real-time to comply with fatigue laws.

Save costs & time

EWD will calculate time periods for you, reducing admin time from manual paperwork.

Real-time data

Proactively manage fatigue breaches with real-time data. Make key decisions when they matter the most.

Accurate reporting

Keep records for compliance audits. EWD reports can be generated and checked roadside when asked for by road enforcement.

Integrated system

With the in-vehicle driver screen, Talon, get a full suite of driver tools to manage driver tasks including checklists, mass management and more.

Schedule shifts with confidence

Assign jobs based on work hours left as well as ensuring rest and work times are within regulation when planning shifts.
